PPE Vending Machines now available in Columbus Airports

COLUMBUS, OH – The Columbus Regional Airport Authority has installed personal protective equipment (PPE) vending machines at John Glenn Columbus International Airport (CMH) and Rickenbacker International Airport (LCK), providing passengers with added options to protect themselves and others.

"Even a pandemic can't stop us from doing everything we can to best serve our customers," said Joseph R. Nardone, President & CEO for the Columbus Regional Airport Authority. "Delivering an exceptional customer experience is at the heart of everything we do. For now, that means going above and beyond in adding measures like new PPE vending machines to help passengers stay healthy and safe along their journey."

The machines contain a variety of PPE, including face masks, hand sanitizer, sanitizing wipes, disposable gloves and non-contact infrared thermometers. Passengers can pay for these items using credit card, contactless-enabled cards or mobile payment.

At John Glenn International, the machines are located pre-security near the Transportation Security Administration (TSA) checkpoints of Concourses A, B and C. At the Rickenbacker Passenger Terminal, a machine is located in the ticket lobby.

The new vending machines are just one way CRAA is helping passengers travel with confidence through its airports. To learn more about what to expect during your next visit, head to flycolumbus.com/updates2020.

About CRAA
The Columbus Regional Airport Authority connects Ohio with the world by managing and operating passenger-focused John Glenn Columbus International Airport (CMH), cargo-focused Rickenbacker International Airport (LCK), and general aviation airport Bolton Field (TZR).
